PROFILE

First-class Agricultural and Environmental Engineering graduate with expertise in GIS, remote sensing, Google Earth Engine, and QGIS. Experienced in environmental analysis and multi-criteria suitability modelling, with a strong interest in applying geospatial technology to sustainable site selection to ensure food security.

EDUCATION

2020/10 – 2024/09
Ho, Ghana

Bachelor of Technology in Agricultural and Environmental Engineering
Ho Technical University
Address: Volta region, Ho, (Ghana): https://htu.edu.gh/
Final Grade: 3.64 out of 4.00 (First Class)

2022/01 – 2022/06
Lahti, Finland

Exchange Program (Energy and Environmental Engineering)
LAB University of Applied Sciences
Final Grade: 3.99 out of 5.00 (37 ECTS)

PROFESSIONAL EXPERIENCE

2024/10 – present
Ho, Ghana

National Service Personnel (Teaching and Research Assistant)
Ho Technical University
Courses Taught (Code): Climate Change and Sustainable Development (AGEN 203), Water and Sanitation Engineering (AGEN 413), GIS and Remote Sensing for Environmental Engineering (AGEN 213), Agro-Waste and Water Resources (AE 342)

2023/02 – 2023/06
Ho, Ghana

Student Intern
Environmental Protection Authority, Volta Regional Office
- I travelled to over 4 districts, covering over 50 towns, to conduct environmental impact assessments
- I went for monitoring, compliance and enforcement in the field
- I assisted the EPA in farmers' education on best available practices before and after farming.
- I developed maps for environmental protection purposes (eg. bushfire locations).

RESEARCH EXPERIENCE

2026/07 – Present

GIS-Based Multi-Criteria Analysis for Agricultural Warehouse Siting in Ghana
The main aim of this study is to identify and map optimal sites for agricultural warehouse development in Ghana using GIS-based multi-criteria analysis. Its specific objectives:
- to identify and spatially model the key criteria influencing warehouse site suitability in Ghana using the Analytic Hierarchy Process
- to identify priority zones for warehouse development based on the suitability surface and existing infrastructure gaps
- to validate and discuss the spatial outputs in the context of Ghana's agricultural storage policy landscape.

2024/06 – 2024/09

Hydro-Climatic Trends in the Volta Region: A Geospatial Analysis of Rainfall Patterns. (Undergraduate Final Thesis: Under Journal Review)
This research was my final thesis, and at the end of the research, the study achieved its main objective
- Analysis of monthly, yearly and seasonal patterns for the past 31 years (1993 - 2023)
- Identify a weaker correlation between rainfall and crop yield within the Volta region
- Using the Mann-Kendall test, no significant trends were found

EXTRA COURSES

- Soil Nutrient and Water Management in Crop Production
- 30 Days QGIS Challenge
- Data Visualization with Python
- GIS for Climate Action
- Learning for Nature: eLearn: Introduction to Ecosystem Restoration
- YouthMappers Course
- Researchers Academy: Mendeley workshop
- Soil Carbon Sequestration and Crop Production
- Applied Remote Sensing Program: eLearn: Using Spatial Data for Biodiversity
- Data Analysis with Python
- Imagery in Action
- Training of Facilitators Course for SDG 6.5.1
- Lahti Winter School 2022: Circular Economy and Climate Change
- Summer School 2022: Planetary Health

ORGANIZATIONS

2022 – present
Ho, Ghana
YouthMappers
Advance Mapper

2026/10 – Present
International Association of Hydrological Sciences
Member

2026/10 – Present
International Association of Engineers
Member

2022 – present
Remote
Google Map
Contributor

2024/11 – present
Accra, Ghana
Youth in Natural Resources and Environmental Governance
Member

2023 – present
Remote
Autodesk Research Community
Member

LEADERSHIP

2024/04 – present
AI Student Ambassador
Ho Techincal University

2023/12 – 2024/08
President
HTU YouthMappers

2023/07 – 2024/08
Vice President
Agricultural Student Association of Engineering

LANGUAGES

- English
- Akan

CONFERENCE, SEMINAR AND TRAINING

2022/10 – present
Online
Stakeholders Forum for A Sustainable Future
United Nations

2025/03
Online
Advanced QGIS Course
Spatial Thoughts

2024/07
Kumasi, Ghana
Ghana Data Science Summit (IndabaX Ghana)
IndabaX Ghana

2024/04
PARTICIPATORY GIS WORKSHOP
YouthMappers

2024/03
End-to-End Google Earth Engine – March 2024 Cohort
Spatial Thoughts

2023/05 – 2023/11 **Global Youth Climate Training**
Global Youth Coalition, Oxford Net Zero

2023/11
Accra, Ghana **Climate Reality Leadership Training**
Climate Reality

2023/09
Accra, Ghana **Local Conference of Youth**
Youth Climate Council

2023/09 **Mapping Our World: Fostering Geospatial Skills and Development Training**
YouthMappers

2023/08 **OpenSummit 23-24: Collective Action Towards Open Mapping for Climate Change**
Humanitarian OpenStreetMap Team

2023/06 **FXB Climate Advocate Summer 2023**
FXB USA Inc.

2022/08
Ho, Ghana **Mendeley training workshop**
Elsevier

AWARDS

2025/03/26 **Advanced QGIS Course Scholarship**
Spatial Thoughts

2024/11/29 **First Class Honour**
Ho Technical University

2024/07 **Interdepartmental Debate (First Place)**
Faculty of Engineering, Ho Technical University

2024/03 **End-to-End Google Earth Engine Scholarship**
Spatial Thought

2022/09 **Erasmus Scholarship Grant**
Erasmus +

PROFESSIONAL SKILLS

Google Earth Engine • QGIS • ArcGIS • Python Programming • JavaScript Programming • JOSM • Kobo Collect • Fusion360 • Microsoft Office • Mendeley

SKILLS

Research Skills • Good Communication Skills • Team Player • Emphatic • Hardworking •

INTERESTS

Documentary • Reading • Violin • Chess
